Original situation:

Model: usedmodel
View: firstViewFromSeveral and secondViewFromSeveral and thirthViewFromSeveral and fourt
Controller: usedController

Your solution:

Model: usedmodel
View: firstViewFromSeveral and secondViewFromSeveral and thirthViewFrom-
            Several and fourthViewFromSeveral
Controller: usedController

Preferred solution (put with a macro, not hard coded):

Model: usedmodel
View: firstViewFromSeveral
            secondViewFromSeveral
            thirthViewFromSeveral
            fourthViewFromSeveral
Controller: usedController
