2 When there's punctuations sign folow, there's no space beetween them : …! !! !? except for the « : ».

3 « In this « test » first level quotes must be guillemot ("«") and « second level quotes » must be the same as english first level — with no spaces. »

5 The sign for hyphenate is « - », not a « – ». The same signe is used for composed-word : Test with the context–synthax, and with a normal-hyphen.

Exactly the same as above, adding the frenchpuntuation rules
1 Each line should look the same, the punctuation is not stick to the word and this space is a nbsp (look at the rules here : http://wiki.contextgarden.net/frenchpunctuation). For each line the source file contain : nospace, normal space, nbsp, thin nbsp, ?̃
